**Subject:** Re: REI Well Sampling

Thanks Sherry. I will have Bill and Linda sign an agreement allowing access during well sampling activities undertaken by REI. Kristen, if you are looking for specific language please provide. I will include this with the well sampling plan. Just need to hear back on status of USGS loggers. Have they been removed?

I remember now that Kristen explained to me that they need to be present for any activity that takes place at the site. I believe that is why she is requiring a signed access agreement from the Kozaks. I didn't think that any of the new wells would be on the Kozak's property though.

Dave,

I have not received a Sampling Plan or equivalent Scope of Work nor the access agreement signed by Bill and Linda Kozak.

Dave,

You will need to send a Sampling Plan or equivalent Scope of Work for the Tribal Natural Resource Department to process approval. Also, the signed access agreement is required.

Kristen

**Subject:** RE: Tower Standard - Lac du Flambeau

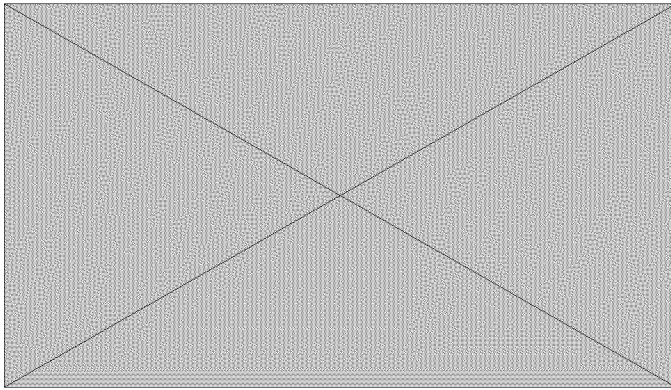

Hello again. The weather next week looks favorable to complete the December well sampling event. REI would like to try to complete this work next Tuesday or Wednesday (December 20-21), if possible. Kristen, please notify me if this is acceptable as the initial notification regarding the December sampling intent was not issued until December 12<sup>th</sup>. Your 10 day notification requirement would not allow REI to sample before Thursday the 22<sup>nd</sup>. I have guys on vacation for the holidays starting on Thursday which would likely push sampling off until after the first of the year.

Kristen, please advise on status of USGS loggers in wells.

Thank you,

David N. Larsen P.G

**Subject:** Tower Standard - Lac du Flambeau

Hello, I have heard back from all regarding the cancellation of the proposed drilling event scheduled for this week, with the exception of Kristen.

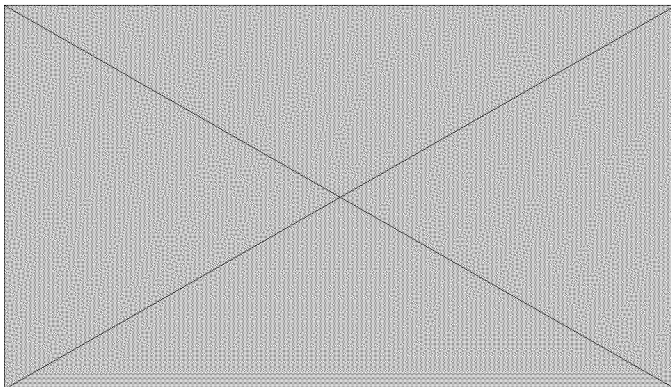

REI is also trying to schedule another round of well sampling at the site. This sampling date will be heavily dependent on weather and I will provide as much advance notification as possible, but REI will be attempting to complete the work before the holidays.

Kristen, are there any loggers remaining in any of the wells that REI should be aware of? If so, please advise on location(s) and options to either manage the loggers or avoid sampling those well(s).

Thank you,

David N. Larsen P.G

Hydrogeologist / Professional Geologist
